# WEATHER SYNOPSIS BY REGION

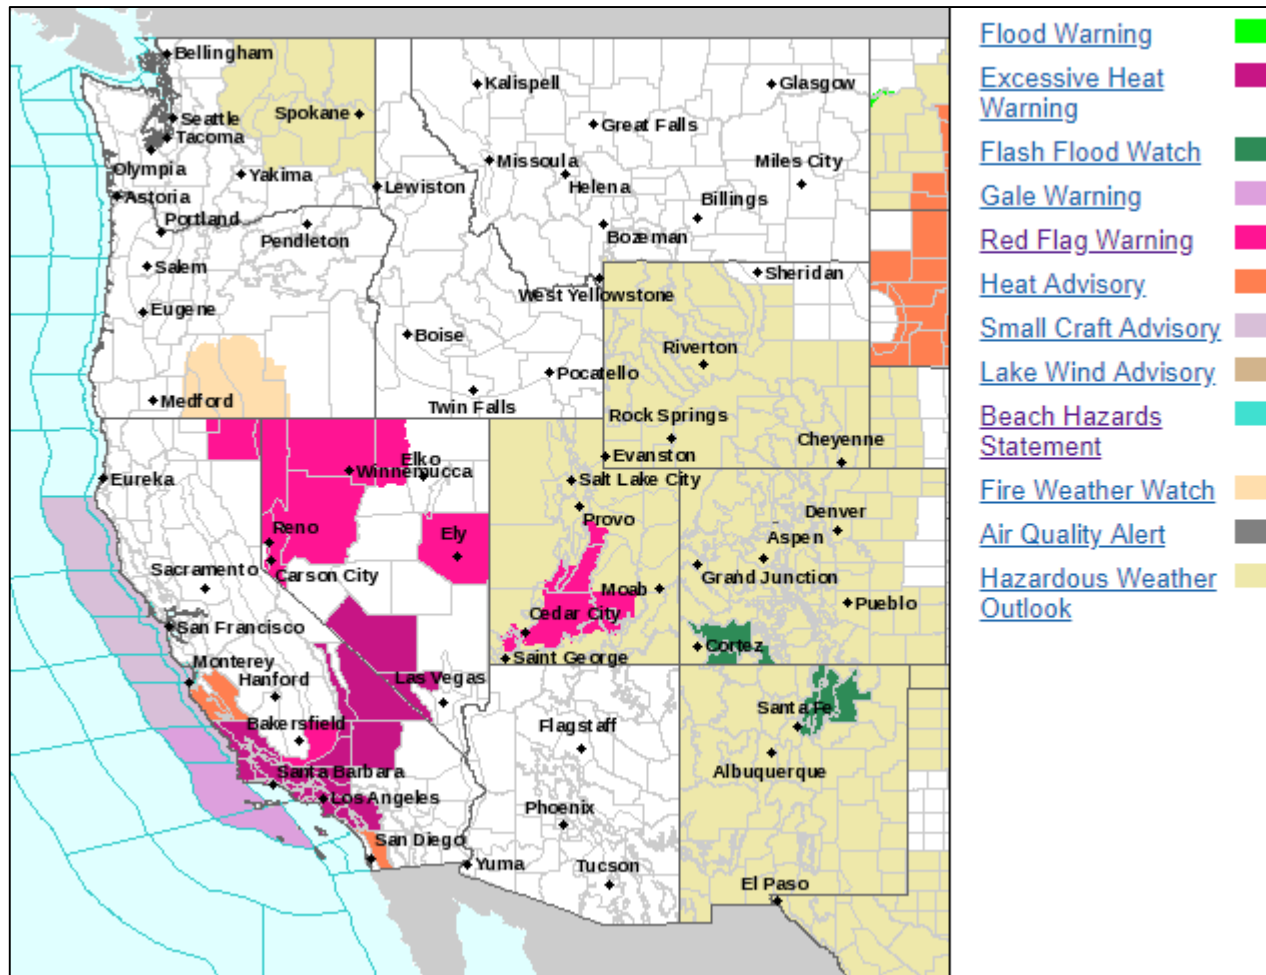

## **NORTHERN CALIFORNIA**

Northern California will remain in southwesterly flow aloft between a high pressure to the east and a trough of low pressure to the northwest. As a result, dry weather will continue with warm dry air streaming into the forecast area. Temperatures will increase into the upper 90s to near 100 for some spots in the valley. This pattern will continue through the beginning of next week with afternoon temperatures remaining above normal. A risk for a few showers and thunderstorms mainly south of Highway 50 towards is forecast for the end of the week.

## **SOUTHERN CALIFORNIA**

A strong high pressure over the Western States will continue to bring a hot temperatures and dry conditions into the weekend. High pressure should move east early next week for partly cloudy skies and a cooling trend. Thunderstorm chances increase Sunday and remain in the forecast through the week as a favorable monsoon pattern remains in place.
